<b>Ticketing Tools</b>	Jira
<b>Office</b>	MS Office family
<b>Soft Skills</b>	Team Management, Problem resolution, Organizational, Communications

### EXPERIENCES AND ACHIEVEMENTS

**June 2016 to Aug 2022: GainInsights Solution (Bangalore Chennai, India) as Senior Engineer & Technical Consultant**

#### Key Responsibilities:

- Project scoping, new requirement negotiation, delegating tasks and achieving daily, weekly, monthly goals & concurrent project support and implementations.
- Liaising with team members, management, and clients to ensure projects are completed to standard. Product maintenance and version release planning, and corresponding version documentation are all included.
- Outlined high-volume, high scale web front ends for assets requiring responsive designs & enforced agile & scrum methodologies on interface projects & shorten development times.
- Implementing the project's best practices with code standards, Motivate and inspire team to give their best, especially when they are under pressure to meet lofty goals.

**Project Name: Calix Networks**

**Role: Senior Engineer, Team Lead**

**Business Use Case:** Calix Networks provides cloud, software platforms, systems and services to communications service providers. We consult and managed the data to do visualization using InfoXD *Product. InfoXD, a no-code interface builder which deployed in the Calix Portal as the iframe URL.* Calix user will do their daily routine activities in the portal, view the reports and manage with the new customers details.

**Technologies, Languages and Tools:** React.JS, Node JS, Postgres, HTML5, CSS3, JavaScript, Qlik Sense, microservice API's, Jira, Confluence, C#.net, windows services & Postman.

**Key Achievements:**

- Led an Agile team in Scrum and ensured team remained focused and delivers the stable and steady on product delivery.
- Tangible with the improvement of timely delivery and a well-managed customer relationship for support.
- Cultivated and produced from the unstable product to clear visual with standard product using industrious standards (minified the resource usage, reduced the server calls, lazy loading, Enable Prefetching).
- Cultivated and produced from the unstable product to clear visual with standard product.
- Participated in the creation of a new internal CI/CD app for customer product management.
- Sustained effective support for all major issues throughout every client product delivery to vendor on a quarterly basis and received with the Technical Excellence award for this project.

**Project Name: State Street Corporation**

**Role: Technical Lead, Team Player**

**Business Use Case:** State Street Corporation is an American financial services and bank holding company. My responsibilities involved creating user responsive *single page web application with pixel perfect visualization* to check their data in collective format.

**Technologies, Languages and Tools:** React.JS, Node JS, Postgres, HTML5, CSS3, JavaScript, , ASP.net.

**Key Achievements:**

- Developed sound knowledge on React, Redux for front end, Node JS as backend and Postgre as Server. Used babel & numerous web pack for compelling & bundling the project.
- Delivered trustworthy goods and exhibited proficiency in providing resolutions to complex challenges, which increased sales and maintained the vendor relationship.
- Improved the visualization efficiency of recent reports to maintained pixel perfect and the database schema to produce reports quickly and transparent data with the design.
- Proven excellent understanding by filling operational gaps, meeting their demands for automated action

---

**PREVIOUS EXPERIENCE**

---

**Nov 2015 to May 2016: Informedix FZZ LLC (Dubai, UAE), as Technical Consultant**

**Key Responsibilities & Achievements:**

Developed an extensive cycle implementation for the lubricant sector with a wide range of applications and reporting. Created a one-page tool (products and vendors) to concisely validate the entire life cycle with the required details.
